

Case 1:14-cv-00750-WMN Document 10 *SEALED* Filed 05/07/14 Page 1 of 3

TO:

Honorable Judge William M. Nickerson
Senior United States District Judge
United States District Court
101 W Lombard St,
Baltimore, MD 21201

RE: Case No: WMN-14-750

MALIBU MEDIA, LLC vs. [REDACTED] subscriber assigned IP address 68.33.27.132

Dear Judge Nickerson:

I am receipt of your court order dated 3/13/14 and I wish to inform the court that the Charges outlined in the order are false and have no basis in fact. I have never downloaded the attached list of movies sighted in the attached documents filed with the attorney for MALIBU MEDIA Mr. Jon A. Hoppe, Esquire; 1401 Mercantile Lane #105; Largo, Maryland 20774. As I have looked into MALIBU MEDIA LLC on the Internet it is apparently a filing designed to get monies from individuals that would rather settle than go through the expense of going to court to defend these charges. On the Internet currently there are hundreds of "hits" related to "Trolling for I.P.s" which is what this is commonly known as.

Judge Nickerson. I am a father of 3 Teens and I haven't worked since 2008 due to illness, I have heart condition. I have no income and I have no assets, my wife hasn't worked since 2011 due to her bad knees and her back, I have no money to fight MALIBU MEDIA, I cannot afford a lawyer, I am struggling feeding my kids let alone pay a lawyer. Your Honor I am innocent and for the past 2 years I have been with my wife almost 24 hours a day and night since we both at home and can assure you neither of us has downloaded movies from MALIBU MEDIA, LLC or anywhere else.

My son plays wireless Xbox, and he often resets the router due to slow internet problems or wireless Router being very slow for his Xbox. Many times he gets frustrated and resets the Comcast Modem and the wireless router. By doing that the wireless router becomes unprotected. I am surrounded by 10 homes the nearest home is 15 feet from me, anyone could have used my wireless including individuals in the street. Any time my wireless was unprotected, I would be unaware since I use a desktop and not a laptop.

Your Honor, I have a record from Comcast of me complaining about Comcast Internet being so "dead" slow and a Comcast technician came to my home and looked at everything and found nothing telling me maybe there is too much traffic in my neighborhood and there is nothing he can do. So this could be an indication someone else in my neighborhood is committing this crime by stealing my wireless. A study done by Cnet.com, April 17, 2013, said even the best wireless router on the market today could be hacked and exploited by a moderately skilled adversary with LAN or WLAN access, Furthermore not only wireless routers are hacked, even Comcast Internet modems are now "cloned" and sold for a onetime fee of \$100 on Craigslist for "**free internet forever**" they claim. Also the list is long on how to steal Internet now a days.
